ALEXANDER WRIGHT

Principal Systems Engineer · Solutions Architect · Cloud Native & AI Specialist · Data Engineer

Location: Toronto, ON, Canada • Mobile: (+1) 555 902 4567 • Email: a.wright.tech@email.com • LinkedIn • GitHub

PROFESSIONAL OVERVIEW

With ~18 years of experience in the technology sector, I have led cross-functional teams delivering cloud-native, highly scalable, and AI-driven solutions adopted by global enterprises. I consistently improve system resilience, time-to-market, and user engagement by applying modern architectural paradigms, microservices, domain-driven design, and multi-cloud strategies. My expertise spans technical leadership, full-stack engineering, and advanced DevSecOps practices. I bring strong capabilities in data streaming, generative AI, and machine learning, leveraging large language models (LLMs), real-time telemetry, and predictive analytics to enhance enterprise platforms. Recognized for strategic vision, seamless cross-team communication, and adaptability, I am committed to mentoring engineering teams and driving future-ready architectures that generate measurable business value.

SOLUTIONS & EXPERTISE

- Distributed Systems & Architecture (Microservices, Event-Driven, Serverless, CQRS, DDD)
- Multi-Cloud Infrastructure & Migrations (AWS, Azure, Kubernetes ecosystem)
- AI Integrations & Generative AI (LLMs, RAG Architectures, Prompt Engineering, Agentic AI)
- Machine Learning & Predictive Modeling (Deep Learning, NLP, Computer Vision)
- High-Volume Data Engineering & Streaming (Apache Flink, Kafka, Real-time analytics)
- DevSecOps & CI/CD Automation (GitLab CI, Terraform, ArgoCD)
- Infrastructure as Code & Container Orchestration
- Advanced Observability, Performance Tuning, and Chaos Engineering

TECHNOLOGIES

Architectures & Paradigms:	Microservices, Event-Driven, CQRS, Event Sourcing, Domain-Driven Design (DDD), Serverless, REST, GraphQL, gRPC, SOLID Principles, Twelve-Factor App, Chaos Engineering.
AI & Machine Learning:	PyTorch, TensorFlow, Hugging Face, LangChain, LlamaIndex, OpenAI APIs, OpenCV, NLP pipelines, RAG implementations, Vector Databases (Pinecone, Milvus).
Data Engineering:	Apache Flink, Apache Spark, Databricks, Snowflake, Apache Kafka, Airflow, Elasticsearch, Data Modeling.

Backend:	Go (Golang), Rust, Java (Spring Boot), Python (FastAPI, Django), Node.js (NestJS), C#/.NET Core.
Frontend:	Vue.js, React, TypeScript, Tailwind CSS, WebAssembly (Wasm), RxJS.
Cloud Platforms:	AWS (EKS, S3, RDS, Lambda, SageMaker, DynamoDB), Microsoft Azure (AKS, Cosmos DB, Azure Functions, Key Vault).
DevSecOps & Infra:	Kubernetes, Terraform, Docker, CI/CD (GitLab CI, GitHub Actions, ArgoCD), Datadog, Grafana, Prometheus, SonarQube, HashiCorp Vault.
Databases:	PostgreSQL, Cassandra, MongoDB, Redis, Neo4j (GraphDB), SQL Server.
Testing & QA:	PyTest, JUnit, Jest, Cypress, Testcontainers, K6 (Load Testing), Contract Testing.

PROFESSIONAL EXPERIENCE

Global IT Consulting Corp. — Lead AI & Cloud Architect **Aug 2024 – Present**

Client: MediCare Global Solutions

- Architected and delivered AI-powered diagnostic and search solutions using RAG pipelines, LLMs, and vector databases, drastically improving medical record retrieval accuracy.
- Built real-time streaming pipelines with Apache Flink and Kafka to process patient telemetry data, ensuring zero data loss with robust DLQ handling and idempotency.
- Developed high-performance microservices using Go and Python (FastAPI), enforcing strict healthcare compliance and data governance standards.
- Migrated legacy workloads to Azure Kubernetes Service (AKS), authored Terraform scripts, and modernized CI/CD pipelines via GitLab CI, reducing deployment times by 40%.
- Mentored junior and mid-level engineers, leading Architectural Decision Records (ADRs) and conducting rigorous code reviews.

Global IT Consulting Corp. — Sr. Platform Engineer **Jun 2020 – Mar 2024**

Client: AeroLogistics & IoT Dynamics

- Designed and built scalable backend systems for global fleet geolocation and IoT event-processing platforms capable of handling millions of concurrent events.
- Delivered asynchronous microservices (Rust/Node.js) and intuitive control panels (Vue.js/TypeScript).
- Established a comprehensive testing strategy (unit, contract, E2E) and automated infrastructure provisioning using Terraform and ArgoCD on AWS.
- Integrated Auth0, multi-tenancy controls, and established event-driven flows with Kafka, significantly improving system security and operational automation.
- Applied advanced concurrency models and memory-safe programming to eliminate latency bottlenecks.

NextGen Software Studio — Sr. Full-Stack Developer **Jul 2016 – Mar 2020**

Client: CloudCRM Inc.

- Co-defined the engineering department's cross-functional quality strategy, establishing CI/CD standards and code coverage minimums across 5+ teams.
- Designed and delivered resilient REST and GraphQL APIs (Node.js/TypeScript) alongside highly interactive frontend applications (React).
- Automated build and deployment pipelines, heavily reducing manual overhead and release cycle times.
- Managed and scaled distributed databases, smoothly transitioning monolithic data structures into scalable PostgreSQL and Cassandra clusters.

EduTech Solutions — Software Developer **Mar 2015 – Jul 2016**

Clients: FinTrust Bank / SmartLearn EdTech

- Delivered backend services for nationwide e-learning platforms utilized in government modernization programs.
- Built secure banking applications with C#/.NET Core, implementing asymmetric cryptography protocols for digital onboarding and biometric authentication.
- Ensured strict software quality and financial compliance via unit, API, and E2E tests, deploying solutions across highly available environments.

Enterprise Systems Ltd. — Lead Developer **Oct 2011 – Jun 2016**

Clients: AgriChain Systems / AutoParts Network

- Led the end-to-end development of enterprise resource planning modules, focusing on procurement, invoicing, and inventory tracking.
- Directed technical strategy, modeled databases (SQL Server), and delivered robust Java (Spring Framework) APIs and ETL processes.
- Built monolithic frontend interfaces and subsequently led the initiative to decouple them using modern JavaScript frameworks.
- Implemented automated testing and staging deployments, elevating system uptime and reliability for critical supply chain operations.

Financial Tech Partners — Jr. Developer **Feb 2008 – Oct 2011**

Client: National Retail Federation

- Engineered core modules for a high-volume debt-collection platform featuring automated dialing algorithms and intelligent agent routing.
- Developed backend logic utilizing Java EJB and PHP, managing complex database transactions in Oracle.
- Gained foundational experience in concurrent programming, system maintenance, and delivering secure solutions in high-pressure financial environments.

CERTIFICATIONS & SOFT SKILLS

- **AWS Certified Solutions Architect** – Professional
- **Certified Kubernetes Administrator** (CKA)
- **DeepLearning.AI TensorFlow** Professional Certificate
- Strategic Leadership & Technical Mentorship
- Cross-functional Communication & Stakeholder Management
- Agile & Lean Delivery Mindset

INDUSTRIES & LANGUAGES

- **Industries:** Healthcare & Life Sciences, FinTech & Trading, Telecommunications, Renewable Energy, E-learning & EdTech.
- **English:** Native
- **French:** C1 - Advanced
- **German:** B2 - Upper Intermediate
